

How to use the Q-paper profiles in Adobe Photoshop:

1. Activate the .icc profile

before you can use the profile, it must be made available in the operating system. To activate the profile, you save it to the folder: **Macintosh HD\Library\ColorSync\Profiles** and restart your computer.

2. Printer settings in Adobe Photoshop

Configure all settings according to the illustration on the right:

- select Color Handling: Photoshop Manages Colors
- select the Q-paper profile as printer profile
- select Rendering Intent: Perceptual
- deactivate Black Point Compensation
